Dear Sir,

We found the testing result of our valid Coagulation Tubes which were kept in stock for a long time won't be constant, Occasionally there were blood coagulation phenomenon.Gongdong investigated it a lot .After numerous experiments, We have found out the reasons and solution for the problem.

**Q:** Will additive(Sodium Citrate) in Coagulation Tubes get loss after a long time in stock?

**A:** As a result of permeability characteristics of Plastic,the buffer solution in Coagulation tube will get loss after a long time in storage.

Unfortunately,eventhough a few of additive's loss,it can affect the result of blood cogulation test a lot. The quality of sample blood is the most important for blood coagulation test, and the ratio of additive and sample blood should be 1:9 exactly.If the additive get loss, the ratio is inaccurate,finally it will affect the test result so as to anticoagulation.

**New solution:** Improved Scientific pcking way - Aluminium and Plastic bag for Coagulation Tubes

Gongdong adopts a new technique into production and package process.It will solve additive 's loss problem totally. The tubes in aluminium and plastic bag won't get loss any more and the valid date will be extended to 2 years.

New package way will protect the blood sample from clotting in order to keep the final testing results accurate.

We consider the Coagulation Tubes will be used in clinic ward and in some places, the requirement for this tube is quite small. so we changed the the package design from 100pcs /rack into 20 pcs/Bag.

**Note:** Once open the bag,in order to keep the accurate result,please use it up as soon as possible.

**We sincerely recommend you to choose our updated smaller package for Coagulation Tubes**

Product Description:

Item No.	Safety CAP	Material	Package /Carton	Additive	Vol. Of additive
GD018SC	BLUE,safety cap	PET	20pcs/Bag*60bags	Sodium Citrate+ citric acid	0.3ml liquide
GD027SC	BLUE,safety cap	PET	20pcs/Bag*60bags	Sodium Citrate+ citric acid	0.3ml liquide

We, marketing Service Dept., will provide you comprehensive and technical consultancy service at any time.We are also glad to supply special samples for your checking and help you built comparative approach;relative data from literature, consultation and helps.
